through inspiring stories illustrating the diverse application of coaching within Asian contexts. This data-rich volume dives into the theory and practice of solution-focused coaching, offering numerous tools and techniques that can be used immediately. With the rising demand for coaching across Asia, there is a need for coaches to have access to up-to-date practice-based evidence of its effectiveness. The solution-focused approach, as a social constructionist approach, privileges the client's experience, resources, and preferred future over an analytic or deficit-oriented stance. Contributors analyse real case examples from many countries across Asia, including Singapore, Malaysia, Indonesia, China, Taiwan, Hong Kong, Japan, Cambodia, and Sri Lanka. Practical in its approach, the book offers new insights into established areas of coaching and also highlights innovations in coaching in areas where solution-focused coaching and other models have not reached until recently. These areas include health and wellness coaching for medical compliance needs, faith-based coaching, and coaching incarcerated fathers. This is an essential and comprehensive resource that is written for both beginner and experienced coaches and addresses the need for effective and culturally sensitive coaching models in Asia. It will also be beneficial for managers and health care professionals looking to enhance their work through coaching skills.
